Juanita written by Gram Parsons & Chris Hillman

D C G D C G A7 D

```
 D      A                                  G                  D
No     affection were the words that stuck on my mind
       A                                G                      D
When she walked out on me for the very last time
D                                  D7                          G
Oh mamma sweet mamma can you tell me what to say
      D                                A                 D
I don't know what I've done to be treated this way
   A                                   G          D
In a cold dirty room that's where I found myself
     A                                  G           D
With a bottle of wine and some pills off the shelf
D                                         D7            G
Oh mamma sweet mamma can you tell me what to say
      D                                        A
I don't know what I've done and I'm feeling so
D
ashamed
```

E D E D D E B7 E

```
      B                                A    E
Then an angel appeared she was just 17
    B                              A          E
In a dirty old town with a conscious so clean
E                                  E7               A
Oh mamma sweet mamma can you tell me what to say
     E                              B                    E
She's brought back the life that I once threw away
```

Repeat last line
